# The Cascade Story

Looking for a window company that offers superior customer service and the right products at the right price?

Welcome to Cascade Windows!

For over 25 years, homeowners and builders alike have turned to Cascade Windows for some of the best-designed, most energy-efficient, and cost-effective windows available. Our West Coast based manufacturing plants and top-rated service department are setting a new standard of service in our industry.

Optional exterior paint colors available for your next window and door project.

Whether it's new construction or a remodeling project, full frame or narrow frame that you need, we give you the flexibility to choose – at no additional cost – when you utilize our standard nail fin option. Standard and optional painted exterior windows are available in any series. Each series also includes your choice of positive auto-lock or traditional cam-lock.

A WOCD, or window opening control device, is also available with both series.

A kitchen window with a view of mountains and a granite countertop with a sink. The window is large and multi-paned, showing a scenic view of mountains and a forest. The countertop is made of granite and features a stainless steel sink with a modern faucet. There are several decorative items on the counter, including vases and a bowl of fruit. The lighting is warm, suggesting a sunset or sunrise.

# Cascade Window Series

Our full-line window series, the Cascade Series, features an innovative design that blends timeless beauty with structural integrity. The series offers an equal sight line design that provides the look of a classic wood window along with innovative features that deliver modern style and functionality.

Standard features include dual coat low-E or EC coating, and Cascade's auto-lock system.

Nesting Handle

Auto-Lock

WOCD - Vent

Security is built into our Cascade Series, too: Sliders and single-hung windows feature auto-locking hardware. Casement windows offer multi-point locks and smooth-operating handles. Both come with a variety of grids styles and design options.

Classic wide frame style • Auto-locking hardware on sliders and single hung windows • Low-E

### Cascade Series or WinPro Window Specs

#### Max system width and height.

Please refer to architectural manual.

**Material:** Extruded vinyl with steel re-enforcement.

**Outer frame types:** 3 1/4" width with 1-1/4" flange set back from outside. WinPro frames also offer 2 3/4" frame width with 1 3/8" flange set back from outside. Other frame options are available.

**Sash construction:** Four corner welded sash.

**Glass options:** EC, EC+, EC Advanced, EC+ Advanced.

#### Grid Options:

Standard 5/8" wide grid with perimeter & valance. Additional glass and grid styles are available.

Additional size options may be available on all window styles and configurations.

### Cascade U-Value

U-values measure the rate that heat transfers through a product. Therefore the lower u-value, the lower the heat loss and the better your home is insulated. Be sure to check the u-values on any window that you might be considering. Our specially coated EC and EC+ windows reflect outside heat in the summer and interior heat in the winter, reducing your air conditioning and heating requirements.

### U-Value Sample Range

### The Advantage of Cascade Windows Glass Coatings

EC = Dual Coat internal Low-E, high performance internal Low-E with more visual light transmittance.

EC+ = Triple Coat internal Low-E, has been specially formulated to reject the sun's heat without affecting the view. It lets in more light and helps keep the heat out.

EC/EC Advanced = Dual Low-E, high performance internal Low-E combined with 4th surface Low-E.

EC+/ EC Advanced = Dual Low-E, Triple Coat internal Low-E with 4th surface Low-E, the best overall combination for low solar heat gain and the maximum reduction in u-value.

The Warm Edge Spacer reduces condensation, reduces heat loss/gain through the glass, and greatly increases the integrity of the insulated glass unit's seal.

## Cascade Series or WinPro Patio Door Specs

**Min panel width:** 24 inches.

**Max panel width:** 48 inches.

**Max system width:** 16 feet.

**Max system height:** 8 feet.
